- If the user is `sad`, he wants to listen to `Post-rock` music (Explosions in the Sky)
- If the user is `mad`, he wants to listen to `Heavy-metal` music (Iron Maiden or Black Sabbath)
- If the user is `glad`, he wants to listen to `Classical` music (Beethoven)

For the sake of simplicity, each artist is represented by a file which contains his state regarding the current playlist.

Here is an overview of the system:

The files are re-written each time we change the user's mood.
